Dear Mrs Long,

Send you a few flowers

for your window. I hope they may

well enough to like them. I shall call

tomorrow sometime & ask after her

I know you are anxious about

about her, so say nothing without

hand.

Love to all yours very truly

A Shakespeare

Mrs Long

Royal Thornton

Royal Astronomical Society

July 3rd. 1850

My dear Sir John,

I send you a letter from the Astronomer Royal which he inclosed with your paper in returning it to me.

I must ask you to revise the proof on it- is quite out of my line. I hope that the printer is an fait in these matters & will give you little trouble, but I can only charge him to put on his best men & to do his best.

Yours very truly

R. Sheepshanks

Sir J. W. Lubbock Bart F.R.S &c &c

Seeing that the A. R. has left his letter open, I have looked into it & find that it contains nothing but the numerical details. He says to me that he thinks these could not well be printed in our Notices & I see that you have decided to have them returned.

DSI

R. A. Society Jan.y 23. 1851.

My dear Sir John,

You were good enough to give us a lecture on the mode of applying maps on the Gnomonic projection to the solution of problems which may be solved by a globe. I fear I must trouble you to express your ideas on paper in order that they may be printed in the Monthly Notice.

I am in no <u>immediate</u> haste, but I wish to proceed with the printing about the middle of next week.

very truly yours

R Sheepshanks

Sir J. W. Lubbock Bart.
